

# Academy of Media Literacy

## Recommended Program Planner

The Media Literacy Academy is designed for students who wish to create, produce, and analyze mass media in written, spoken, audio, or visual forms. Students will develop the skills needed to make independent judgments about media content and its influence on the world around them.

This is a sample planner that may be tailored to meet a student's individual needs. Students should work with their counselor to create a successful four-year plan. All students must take prescribed English, math, science, social studies, and other courses required for a Maryland high school diploma.
